<sup>1/</sup> Each family type includes both husband and wife. Number of persons other than husband and wife was determined on the basis of year-equivalent persons. See Glossary, Family Type.

<sup>2/</sup> These are year-equivalent persons. The method of computing the average number of all members is slightly different from that used in computing persons under 16 or 16 and over. See Glossary, Year-equivalent Persons, for description of method. Averages are based on the corresponding number of families in each class, column (2).

<sup>3/</sup> Regardless of age.

<sup>2/</sup> This is the same as the total number of families, column (2), since all families had expense for food and household operation.
